

NOTICE TO ALL SHOOTERS: A NEW PROJECT JUST FOR YOU!

We are thrilled to announce yet another new project! As of the beginning of May, we will begin construction of an all new Five-Stand : a two floor building featuring 10 different shooting positions. The building itself will be equipped with two pigeon throwers, in addition to the eight other pigeon throwers located across the range, for a different presentation from each shooting position.

In addition, thanks to the building's open-air "terrace style" top floor, shooters will be able to take full advantage of the summer season while enjoying shade and the shelter of removable canvases. The ground floor, for its part, will offer warmth and comfort throughout the cold season, making winter shooting more enjoyable than ever!

This unique facility is sure to be a delight for all shooters, in all seasons!

Of course, construction inevitably means construction sites! As always, we will do our utmost to keep construction work as unobtrusive as possible; however, please excuse us for any inconvenience you might experience as a result of these efforts.
